PROFESSIONAL SUMMARY

Full Stack Developer with strong experience in building and maintaining production-grade web applications using React and Node.js. Proven ability to work across the stack, own features end-to-end, and contribute to scalable, maintainable systems in collaborative product teams. Seeking a full-time role focused on long-term product development and technical growth.

SKILLS / TECHNOLOGICAL EXPERIENCE

- Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS
- Backend: Node.js, Express.js, MongoDB, REST APIs, Authentication
- Real-Time: WebSockets, Socket.IO
- State Management: React Context API
- Tools & Deployment: Git, GitHub, Postman, Vercel, Render, GitHub Co-pilot

PROFESSIONAL EXPERIENCE

Full Stack Developer

Arronic, Guwahati | Jun 2023 – Nov 2025

- Worked full-time on internal and client-facing web applications with long-term ownership of core modules
- Contributed to multi-release product development cycles with emphasis on stability, scalability, and maintainability
- Developed and scaled 5+ production modules using React to support complex business workflows
- Designed and delivered 20+ reusable UI components, reducing feature development time by 25–30% and improving UI consistency
- Integrated frontend applications with 10+ REST APIs, ensuring reliable data flow and predictable performance
- Implemented authentication and role-based access control supporting 100+ active users across multiple workflows
- Contributed to backend API development using Node.js, Express, and MongoDB across production releases
- Collaborated cross-functionally with product, backend, and QA teams to deliver features end-to-end

PROJECT EXPERIENCE

RhinoChat – Real-Time Chat Application ([Github](#))

React, Node.js, Socket.IO, MongoDB

- Built a real-time messaging system with Socket.IO supporting one-to-one and group chats
- Implemented secure authentication and message persistence using MongoDB
- Designed a responsive React UI optimized for desktop and mobile usage
- Managed real-time events, user presence, and message synchronization

Rhino Movies – Movie Discovery Platform ([Demo](#) | [Github](#))

Next.js, TMDB API

- Built a server-side rendered movie discovery platform using Next.js to improve initial load performance and SEO
- Implemented dynamic routing and search functionality for browsing movies by category and title
- Integrated the TMDB API to fetch and display real-time movie data, including ratings, overviews, and posters
- Optimized page rendering using Next.js data-fetching methods and deployed the application on Vercel

ACADEMIC QUALIFICATIONS

Bachelor of Technology, Aligarh Muslim University | 2018 – 2022

Senior Secondary, AMU Board | 2018
